Summary

Open-source developer-relations and documentation leader with 8 years across developer education, community support, and technical writing. Built and ran the documentation and support forum for Streamlit (1M+ monthly active developers), resolving the bulk of user issues and acting as the bridge between users and product and engineering. A strong written communicator who ships docs, code, demos, and content, and represents products publicly through talks, videos, and writing.

Experience

Head of Documentation

AstroBee

*Remote, India
June 2025 – May 2026*

- Built the documentation site and owned all of its content, demos, and assets (including tutorials, guides, and reference docs).
- Assisted with growth initiatives including content creation, SEO, social media marketing, and the execution of growth experiments, with deliverables spanning blog posts, content briefs, outbound copy, landing pages, and performance reports.

Technical Product Manager - Streamlit Open Source

Snowflake

*Remote, India
Apr 2023 – Mar 2025*

- Joined Snowflake through its acquisition of Streamlit; responsible for the Streamlit open-source library (40k+ GitHub stars, 1M+ monthly active developers, used by 90% of the Fortune 50), working with a team of 2 PMs and 10 engineers.
- Built and launched new Streamlit features across data visualization, ML, GenAI, geospatial, UI/UX, and multimedia.
- Defined Streamlit's long-term strategy and roadmap with fellow PMs and leadership, translating it into detailed requirements, wireframes, and prototypes.
- Maintained the library through feature development, bug fixes, and community engagement, ranking among the [top 10 contributors](#) ↗.
- Partnered with marketing on go-to-market planning across pricing, packaging, positioning, competitive analysis, and sales enablement.
- Drove user research (interviews, surveys, usability studies) and turned insights into shipped product solutions.
- Represented Streamlit publicly — speaking at live events, appearing in videos, and writing blog posts.

Product Manager - Streamlit Documentation

Snowflake

*Remote, India
Apr 2022 – Apr 2023*

- Defined the customer and knowledge journeys most critical to docs and mapped the product to them.
- Owned every area of the docs platform (getting started, tutorials, API reference, search, knowledge base, telemetry) with clear vision and success criteria.
- Created the vision and strategy for scaling docs to support future product growth (more features, integrations, components, apps, and Snowflake integration).
- Managed a team of technical writers and content strategists delivering high-quality documentation, while owning platform engineering and product management.
- Defined metrics and success criteria for key decisions, instrumenting telemetry and data apps to track the impact of engineering and content work.

Developer Advocate

Streamlit

Remote, India
Apr 2021 – Apr 2022

- Part of a team of 50 [acquired by Snowflake for \\$800 million](#).
- Ran the Streamlit community forum and supported users across GitHub and social media as the go-to resource for users in trouble, resolving the majority of their issues and serving as the bridge between our users and the product and engineering teams.
- Sole technical writer and second DevRel hire for the Streamlit open-source library, reporting to the co-founders and Head of DevRel; owned all [documentation](#), tutorials, and guides.
- Led development of a new documentation platform (with design and engineering) on Next.js, MDX, and Netlify, migrating all content off Sphinx and ReadTheDocs.
- Shipped new product docs, tutorials, guides, example scripts, and auto-generated reference docs; reworked existing content to keep it fresh and engaging.
- Designed Streamlit's education program, enabling adoption across classrooms, boot camps, and internships.
- Built internal Streamlit apps and profiled telemetry to surface product and leadership insights; one app tracking cloud costs identified ~\$100k in savings.

Machine Learning and Data Science Instructor

Coursera

Remote, India
Dec 2019 – Apr 2021

- Built curricula, instructional content, and video for 40+ Guided Projects on machine learning, deep learning, data science, and data visualization, reaching 290K+ enrollments.
- Coursera's first-ever project instructor and author of the first project on the platform.
- Covered topics including Plotly/Seaborn, scikit-learn, H2O AutoML, TensorFlow/Keras (NLP and CV), BERT, TensorFlow Serving, feature engineering, and ML pipelines.
- Co-authored instructor onboarding docs and designed assessments for deeplearning.ai's TensorFlow
- Data and Deployment Specialization.

Skills Consultant

Coursera

Remote, India
Oct 2020 – Apr 2021

- Built a source of truth with 100% accuracy for skill-to-content tagging to power Coursera's Skills Graph.
- Audited 400 of Coursera's courses against the skills taxonomy, partnering with the Skills Graph team to ensure dataset quality for downstream ML needs.

Machine Learning Instructor

Rhyme.com (Acquired by Coursera)

Mountain View, CA
Aug 2018 – Oct 2020

- Created a portfolio of 20+ interactive, hands-on projects on machine learning, deep learning, and data science that led Coursera to acquire the company.

Education

Minerva University

BS in Physics and Computer Science

Aug 2015 – May 2019
